

Health and safety standards

Your safety is our biggest priority, that is why we follow the guidelines of the authorities based on the health certification that must be obtained by tourist service providers:

We will be closely monitoring the health of our guides and staff.

Our drivers and guides will wear facemasks, and will provide you with a facemask if you don't have one of your own.

Our staff will be carrying and using sanitation equipment on every tour.

All of our equipment and vehicles will be sterilized after every use and before every tour. Every time you board any of our vehicles, you will be sure that they are completely clean and disinfected.

In our tours we will only visit those locations that have obtained the sanitary certification.

We will prevent our clients from being in the presence of crowds; for this we will be monitoring and coordinating the schedules of other tour operators to prevent too many people arriving the same attraction at once.
